

Multidorm Flex

The standing bed for your home

Max.
patient
weight
135 kg

Safe
working load
170 kg

Dimensions:
90 x 200 cm

Height
adjustment
range
40 - 80 cm

◀ The Multidorm Flex can be controlled via the handset or the control panel on the bed.

▶ If the patient is in the standing position in the event of a power failure, the bed can be lowered using the manual emergency release.

The **Multidorm Flex** is primarily used for passive standing training in home care and is often used for the early mobilisation of patients. The standing position serves to strengthen the circulation, improve breathing, prevent osteoporosis and drain the upper urinary tract, among other things.

Product details

- | Under-bed clearance: 11 cm
- | Standing function and TV position individually programmable
- | Patient lifting pole with grab handle incl. central receptacle (optional)
- | Integrated manual emergency lowering
- | Belt system with three high-quality support straps
- | Central braking system

Product images

The product images on this page show the H-variant of the standing bed (with wooden side rail). The final product changes visually due to optional equipment ("Extra equipment/optional" on next page), such as a wooden or plexiglass work and therapy table. The O-version (without side rails) of the bed is also visually very different due to modified wooden elements. If you have any questions regarding the equipment options, please do not hesitate to **contact us** .
